

Mid-South Educational Research Association Annual Meeting
November 1-3, 2016
Kaitlyn May, Educational Psychology

While at MSERA I presented a talk overviewing a literature review on the cognitive and socio-emotional effects of media multitasking I composed under the guidance of Dr. Anastasia Elder, Educational Psychology. I received positive feedback from other attendees and was able to successfully network while at the conference. MSERA places a high emphasis on mentorship; consequently I received advice and contacts from several faculty guests. I am very grateful for the support of the Honors College of my trip to MSERA.
